

Newnan Utilities Compost Facility

In 2007, Newnan Utilities proudly announced the implementation of a long term, practical solution for bio-solid reuse with the development of a composting program. This responsible choice will create a soil additive byproduct to be used in landscape applications. Our state-of-the-art composting site will provide an alternative solution to landfill dumping, solidifying our position of accountable environmental management.

The Benefits of Newnan Utilities' Compost Facility Include:

- Ease of entry and exit; completely paved for no rain delays
- Data collection system to provide a fast turnaround time for haulers
- Convenient location
- Flexible hours of operation as needed to accommodate large hauls
