

Keeping our valued customers current on all things water, power, and resource conservation.

Why Your August Bill May Be Higher

July's high temperatures meant air conditioners were working harder than usual. When it's 95°F outside and your thermostat is set to 72°F, your AC runs longer to close that gap—using more energy. This increased demand often leads to higher electric bills in August. Small changes like raising the thermostat a few degrees or using fans can help reduce energy use.

Carl Miller Park was once again named Best of Coweta for Outdoor Recreation by Newnan-Coweta Magazine!

From the splash pad to playgrounds and picnic areas, this local favorite remains a top choice for family fun.

Committed to Safety: Hurtman Rescue

Our line crew recently completed Hurtman Rescue Training—a critical exercise that prepares them to respond quickly if a teammate is injured in the field. Safety remains our top priority.
